-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/19/06 has been entered.

2. Claims 13-31, 33-35, 38-46, 51-56 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as originally filed does not provide support for the limitation that the stainless steel fibers are made from a high temperature alloy. The specification as originally filed teaches "heat resistant stainless steel fibers" and teaches that "Fecralloy" is a suitable variety of heat resistant stainless steel fibers, but the specification does not recite that the stainless steel fibers are made from a high temperature alloy. Applicant has provided information in the form of material data sheets describing the composition of Fecralloy. The specification needs to be amended to include these limitations. Further, such amendments must be supported by satisfactory showings establishing that the specific nature or process of manufacture of the product as set forth in the amendment was known at the time of filing of the application. Therefore, Applicant needs to provide a showing that the trademark Fecralloy at the time the application was filed has the

Art Unit: 1771

meaning and composition shown in the attached information. The showing in the appendix does not appear to have a date showing that the composition at the time the application was filed the same as the composition at the time the material data sheet was obtained.

3. If suitable amendments accompanied by a showing establishing the specific nature of the Fecralloy product at the time the application was filed are made, the claims would define allowable subject matter over the prior art since the prior art does not provide motivation for forming a burner membrane out of high temperature alloy fibers and then not sintering the membrane. The prior art does teach forming filters from stainless steel fibers which are not sintered, but there would not be a motivation to use high temperature alloy fibers to make a filter.
